What Issues Did Client Face?

Earlier client had separate tools for managing finance processes, HR operations, employee time sheet and attendance, payroll, etc. There was no integration among these tools. This caused various inefficiencies that adversely impacted the business operations. Client required a solution that streamlined the existing business processes and helped in efficiently managing different projects. The system should also provide integration of finance, payroll, and projects. It should help with accurate employee time sheet recording to enable optimized human resource utilization.

How Did We Resolve These Issues?

We developed a comprehensive system to take care of finance, HR & payroll, employee time sheet and attendance management, and project management. The tight integration among these diverse business operations has greatly improved organization's productivity. The system was designed to be easily scalable with the growing needs of the organization.

Arionerp is dedicated to providing the best industry specific ERP solution for your business with great functionalities. We provide great customer satisfaction by continuous growth and innovation.

Arion

Key Points Of Our Solution

We employed best practices as per industry standards to build one solution for handling various business processes. The solution helps in tracking the progress and profitability of projects. The development work was carried out promptly; any modifications or new requirements suggested by the client were duly incorporated.

How Did The Solution Benefit Client?

The integrated and optimized business processes have made the client's organization a lot more efficient, which in turn has helped in making their business more profitable. Client was very happy with the quick and high returns that they achieved as a result of their investment in ArionERP solution.
